Creating the Future

What is IYLIF

International Youth Leadership & Innovation Forum is a platform for youth from all around the world to speak, discuss and collaborate on topics that matter to them.

We believe innovations happen when we create an environment to foster creativity, meaningful dialogues, diversity and collaborations.

Annual IYLIF conferences bring together a global panel of experts, educators, parents and accomplished youth from all over the world. So far, students, teachers and experts from 21 countries have participated in IYLIF annual forums.

IYLIF is a platform that empowers youth to express their visions, actions and innovations. Here they can unravel infinite possibilities, go beyond the boundaries of countries and cultures to collaborate and achieve their full potential as global citizens and change makers.

IYLIF is a platform that provides Singaporean youth leaders with the opportunity to mingle with youth leaders from other countries. They are mentored by world class experts. Youth gets the opportunity to have meaningful dialogues with experts and educators. This is the one of the only platforms where we hear the voice of youth about their future compared to many forums where that let the youth listen to the adults.
